(**FIX-FILE**

```
(LAMBDA (FILE) ; Edited 23-Aug-95 13:01 by jds  
  ;; Take a lisp source file, and re-dump it with all record declarations (NOT including BLOCKRECORDS) changed so they're compatible with  
  ;; Medley 3.0.  
  ;; This really only involves marking each record as changed, so the file manager re-dumps the pre-parsed version of the record declaration.
