

```
;; This is a collection of tests from the GCHAX.NoteFile. It tests the GCHAX library package.
All the functions documented in GCHAX except \SHOW.CLOSED.WINDOWS are tested minimally to ensure they are there and do
not blow up. This set of tests can take several minutes to run as some tests search for
references to pointers. Also, they will ask several times "Shall I search for pointers to this
object?" And answer itself "no" each time after a wait if the tester does not answer. The
individual test files for each of the functions have been appended together in this big file to
share common code and gain diagnostic information by testing the functions in a particular order.
```

```
;;
;; The source for the text file listing is the NoteCards database at
{Erinyes}<Test>Lisp>Lyric>Plans>GCHAX.NoteFile. Changes are made only to the NoteFile. The
listings are
;; Filed As: {eris}<lispcore>test>GCHAX>GCHAX.test
