

Interpress/Press tests

Last run 29-Feb-88
By Will Snow

Tests performed on 1186 with Medley of 12-Feb-88 18:51:29.

Interpress

Hardcopying standard text files with fonts went well, once the documentation and software was fixed to point to the right directories.

However, when printing sketch files, any and all graphics were lost; text prints fine. This only applied to sketches made from Lyric (which all the test files are.) I tried creating a new sketch, putting it to a file, and hardcopying that, and it worked. I also tried GETting a lyric file from a sketch window and hardcopying there, it didn't work either. Nor did PUTting the file from the sketch window and hardcopying the new file.

Then for an interesting test I tried opening a sketch, drawing random things, and shift selecting the elements into a tedit window. This didn't work either. Again, only the text was recognized.

****NEEDS FIXING****
