UNIXMAIL

By: Bob Bane (Bane.mv@envos.Xerox.com)

INTRODUCTION

UNIXMAIL is a new mail sending and receiving mode for Lafite. It sends mail via Unix hosts using the SMTP mail transfer protocol and can receive mail either by reading a Unix mail spool file or by calling the Berkeley mail program.

INSTALLATION

Turn Lafite off, load the file UNIXMAIL, make sure UNIXMAIL is configured appropriately (check the settings of the variables below, and make sure any other modules UNIXMAIL m
