```
DEMO -- utilities for running demos / tutorials in Medley

includes
    OPEN-URL (URL)
                (rename of ShellBrowse)
    MEDLEY-CONTRIB(REPO)
                 shows GitHub contributors to given repo
                 uses ShellBrowse
     BKSYSOBJ(string)

DEMO-*.TEDIT
    contains scripts / TEDIT file talks
    add your own

BKSYSOBJ is the start of a facility

(TEDIT.INSERT.OBJ (BKSYSOBJ "(CONS NIL")      (TEXTSTREAM(WHICHW)]

You should see (CONS NIL) in the TEDIT stream, clicking should shove (CONS NIL into an Interlisp
exec, waiting for ) or ].  (probably the image objectg should be shaded, may also have to set the
RDTBL flag on BKSYSBUF for strings, but this is a start).
```
